(2) On a consolidated basis.

2 How will we use the available funds?

The above noted allocation of capital and anticipated timing represents the Company's current intentions based upon its present plans and business condition, which could change in the future as its plans and business conditions evolve. Although the Company intends to expend the proceeds from the Offering as set forth above, there may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary materially from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including the Company's ability to execute on its business plan. See the "Cautionary Statement Regarding Forward-Looking Information" section above.

The most recent audited annual financial statements and interim financial report of the Company included a going concern note. The Company is focused on developing, exploring, mining and processing fluorite on the Lost Sheep Property and has not yet generated positive cash flows from its operating activities, which may cast doubt on the Company's ability to continue as a going concern. The Offering is intended to permit the Company to continue to achieve its business objectives and is not expected to affect the decision to include a going concern note in the next annual financial statements of the Company.
